MOTOROLA HARNESSING THE POTENTIAL

TETRA has created an opportunity for organisations to radically rethink their operational communications. It enables integrated, future-orientated, wireless services that address growing mobile voice and data communication needs.

TETRA is one of the most powerful digital voice and data technologies available with a powerful capacity for data transmission. Its sophisticated technology offers many benefits that can revolutionise your day-to-day business activities.

With convergence to IP connectivity, the integration of value adding solutions can be integrated smoothly and cost effectively in the areas of mobile wireless, integration technology, fixed telecommunications and multi-media.

Whatever your operation – from protecting the public to managing a transport network – it can benefit from TETRA. To meet the many different operational and business needs, a wide variety of specialist applications are required. These applications turn a communication system into a total communication solution.

Motorola's Application Partner Program delivers outstanding and highly innovative applications, developed by acknowledged industry experts from around the world to harness the true potential of TETRA Communication Solutions.

THE FORMAL ACCREDITATION PROCESS

The accreditation process establishes a partner's ability to develop and integrate applications on Motorola's TETRA platforms.

THE APPROVAL PROCESS

The approval process recognises and certifies the robustness and performance of a partner's TETRA system application.

The process of accreditation and certification is a formal process designed to ensure the highest levels of quality and customer satisfaction.

"The partner program delivers a comprehensive and tested TETRA solutions portfolio embracing all critical aspects of your operational needs".

THE PARTNER PROGRAMME

Globally, Motorola's open and non-exclusive programme works with and accredits selected technology developers. These are partners who have proven their ability, expertise and commitment to deliver performance applications for a wide range of vertical industry sectors. These partnerships enable us to provide a wide range of high quality, integrated, customer focused applications.

The applications, combined with Motorola's extensive experience in radio systems and other critical solution components, produce the power behind the solution.

The Application Partner Program delivers a comprehensive and tested TETRA solutions portfolio embracing all critical aspects of your operational needs. Examples include:

- **Automatic vehicle location** – Operational efficiency and effectiveness is improved significantly by applications such as Automatic Vehicle Location (AVL) used to track and manage fleets of vehicles over a wide area
- **Fleet mapping** – automated management, reporting and programming of fleet radios
- **Integrated command and control systems** - total incident management system linking the control room to mobile intelligence and resources in critical situations
- **Fingerprint biometrics** – scanning, authentication and data access protection systems
- **Information management and access solutions**
- **Computer Aided Dispatch** – for public safety, transport and utilities
- **Billing systems**
- **Integrated vehicle solutions** – mobile data systems with remote database access, messaging and control of in-vehicle functions (e.g speed camera)
- **Digital recording systems** – storage and retrieval of voice, data and system activity

SUPPORT FROM MOTOROLA

Key to the success of the Application Partner Program, is recognising the need for Motorola to support its' successful deployment. Essential investment has made possible the deployment of comprehensive and professional support services energising the program's execution. This has been realised with the creation of the TETRA Interface Support Centre, comprising a team of high calibre engineers supporting customer projects and application partners.

The introduction of a TETRA Solutions Test Laboratory enables the approval of TETRA integrated solutions, and evaluations of performance and robustness. All support services provided by Motorola are available to members of the application partner program around the world.

SOLUTION = SYSTEM + APPLICATIONS

The breadth of live applications on TETRA offers tangible proof of the practical ways in which digital communications can already be leveraged to address operational requirements and enhance mobile organisational capabilities.
